

TailorTalk Sales - Lead Insights Report

(20-04-2026)

Executive Summary

This report summarizes all lead interactions recorded on **20 April 2026**. Overall interest was exploratory and qualification-focused. Most leads were asking whether TailorTalk fits their business size, channels (WhatsApp/Instagram/Website), and industry use-cases. A large portion of conversations stalled because leads did not share monthly lead volume or primary enquiry channels, which are required to qualify them. High-intent signals appeared from businesses in amusement parks, online courses, retail/garments, fitness studios, and agencies, mainly asking for demos, pricing, and scalability. Several leads were filtered out due to low lead volume (<300/month) or non-fit channels (email-heavy workflows).
